PROJECTS

DarkSurfer-Extension |  | 

01 2024,Present

- DarkSurfer-Extension, is a project based on the application of advanced Language Models LMs to detect and eliminate dark patterns on websites. It aims to improve user-awareness, exposing real-time of devious design practices in situ. It helps make the internet more user-friendly by using its novel LMs and popular LM-based models, such as RoBERTa, BERT, and XLNet.

LinkedIn Sentiment-Analysis |  | 

12 2023,Present

The LinkedIn Sentiment Analysis project uses AI to analyze LinkedIn posts and interactions, offering insights on engagement, historical trends, and competitor performance. Features include profile metrics, sentiment analysis, and visualizations.

Responsive-Weather-Forecast-Website |  | 

05 2023,Present

- This project is a weather website that provides live weather updates and forecasts based on your location. Stay informed about current weather conditions, temperature, and more. Explore interactive maps, hourly/daily forecasts, and helpful insights. Stay ahead of the forecast and make the most of your day!
